Summer 2026 | Aviation Training Content and Learning Systems Intern

Location: DeBary, Florida (on site)
Duration: 10 to 12 weeks
Type: Paid internship, full time (up to 40 hours per week)
Start date: May 2026
Travel: Minimal, as required

Company and Team

Maloy Aircraft is a new aircraft OEM based in DeBary, Florida, developing the MA-1 Blue Jay training aircraft program. In parallel with aircraft development, Maloy Aircraft is building an integrated training ecosystem that combines aircraft, simulation, and software to support high quality professional pilot development. The learning management system is a core part of this ecosystem and provides the structure through which training content is delivered, tracked, and scaled.

Role Summary

Maloy Aircraft is seeking an Aviation Training Content and Learning Systems Intern to support the development of training modules within the company learning management system. This role is intended for a Certified Flight Instructor with a strong academic aviation background who can serve as a subject matter expert for professional pilot training content. You will work closely with engineering and product teams to translate real world flight training knowledge into structured, system ready instructional content. This is a content development and training architecture role, not a flight instruction role.

What You Will Do

- Develop and structure aviation training content for integration into the learning management system
- Translate flight training concepts into clear, modular instructional material suitable for digital delivery
- Define lesson objectives, training flows, and assessment concepts aligned with professional pilot training standards
- Collaborate with engineering and software teams to ensure training content aligns with system capabilities and constraints
- Review and refine training modules for technical accuracy, clarity, and consistency
- Help organize training content to support scalability, version control, and long-term curriculum growth

What You Will Bring
- Bachelor's degree in aviation science or a closely related aviation discipline
- Certified Flight Instructor certificate
- Strong written communication skills and the ability to clearly explain technical aviation concepts
- High attention to detail and strong organizational skills

Nice to Have
- Experience in structured flight training environments such as Part 141, collegiate aviation, or military flight training
- Experience developing lesson plans, syllabi, or training materials
- Familiarity with learning management systems or digital training platforms
- Interest in aviation training systems, instructional design, or training standardization

How to Apply
Please submit a resume and a brief cover note describing your interest in aviation training content development. You may also include an optional writing or instructional sample such as a lesson plan, syllabus excerpt, or training material you have developed.
Send materials to **careers@maloyaircraft.com**.

Application window closes: March 13, 2026, at 11:59 PM

Compliance Notes
Applicants must be authorized to work in the United States.
